Seamlessly integrating multiple security elements, the NetworX system delivers optimum security for current and future needs of your home or small business. Particularly well-suited for new construction, NetworX offers a wide selection of hard-wired security elements including keypad, motion sensors, glassbreak detectors, smoke detectors and magnetic contacts.

For added convenience, NetworX has extensive wireless capabilities backed by expert technicians experienced in optimal system design. This system also easily integrates with many third-party control systems such as home automation, lighting, HVAC and audio. Complete with cellular backup, NetworX represents one of the most advanced, expandable and reliable security solutions available.

Expanding Your Comfort Zone

Your professional security dealer can custom design a system best suited for your home and security needs. Part of this design includes creating areas of protection. Defined areas, or zones, are covered by specific sensors and detectors, yet it is simple and easy to arm/disarm the whole residence with a single button. If an alarm is triggered in your home, your system will be able to display which room or area the alarm is coming from as well as the type of alarm, such as a window being opened or a motion sensor activated.

Sensors and Peripherals

A full line of intrusion protection solutions is complemented by a large selection of sensor and peripheral components that can enhance your home's security. Wireless and hard-wired sensors are compatible with all products. These added security elements represent our commitment to comprehensive security and protection:

- Door/window sensors
- Motion detectors
- Magnetic contacts
- Wireless smoke and carbon monoxide detectors
- Keypads and keyfobs
- Glassbreak and shock sensors
- Wireless quick-bridge receivers and repeaters
- Cellular-based communication modules
- Proximity card readers/door control modules

In addition, Global System for Mobile Communication (GSM) allows you to monitor and control your security system from your Web browser and be notified of system events by email, PDA or phone.

Control Panels

With a track record of global security success, the NetworX product line includes a series of control panels that are universally compatible with all NX products and several wired and wireless accessories that can be scaled or modified to meet changing security requirements. The control panel functions as the “brains” of your security system, coordinating input from different sensors and transmitting alarm monitoring information to a central monitoring center. Fully versatile, these control panels accommodate a variety of integrated components that allow you to customize, and easily expand, your system to meet your security requirements. All NetworX control panels have fire alarm verification capability to help prevent false alarms.

*A world of difference—
millions of NetworX
systems have been
sold around the globe.*

NX-4

The NX-4 control panel is a flexible, entry-level security system that features advanced technology for the detection of burglary, fire and environmental events. A cost-effective solution that is easy to install, the NX-4 is ideal for apartments, smaller homes and commercial environments. Equipped with the standard four hard-wired zones, the NX-4 can easily expand to eight fully programmable hard-wired zones, eight wireless zones or a combination of both.

NX-6

The NX-6 is a full-featured system designed to handle most medium-sized residential and commercial applications. Like all

NetworX control panels, its modular design allows for complete integration of multiple systems within one enclosure. In addition to the features found on the NX-4 model, the NX-6 comes standard with six hard-wired zones and can easily expand to 12 fully programmable hard-wired zones, 16 wireless zones or a combination of both.

NX-8 and NX-8E

The NX-8 and NX-8E represent the top-of-the-line systems for the most demanding home and commercial security needs.

These feature-rich units include all the capabilities of the NX-6 model with options to accommodate an extensive number of keypads and users.

Comprehensive Security

NetworX systems are built on a modular platform that represents a tremendous value.

Through optional accessories, such as wireless GSM communications and a TCP/IP interface,

NetworX offers Web-based connectivity for a highly flexible and powerful security solution.

	NX-4	NX-6	NX-8	NX-8E

Keypads

NetworX security systems offer numerous keypads to meet your specific needs and preferences. Featuring user-friendly options including touch screens, integrated intercoms and built-in wireless functionality, NetworX keypads provide simple, convenient setup and operation. Allowing you to turn the security system on or off by entering a simple numeric code, these keypads are designed with practicality in mind and complement virtually any décor. Dedicated emergency keys can be programmed so that fire, police or EMS can be contacted at the touch of a button.

Available as touch screen, LCD, LED and Fixed English, NetworX system keypads feature easy-to-read information displays. Clear indicators and messaging give you complete system information and status, making it simple to find the right keypad for your unique lifestyle.

NX-1820E

Touch Screen Keypad

The NetworX Touch Screen Keypad offers powerful yet simple control for almost any size application.

- 3.5" color touch screen
- Streamlined, modern design with icon-based interface
- 192 zone capability
- Quick Keys for Arm, Stay and Status functions
- Customizable naming and chime groups for specific zones

NX-1811E & NX-1813E

Advanced Touch LED Keypad

The NetworX Advanced Touch LED keypad brings together enhanced protection that is simple and easy to program and control.

- Interactive Personal Voice Guide (PVG)
- Voice-enabled status keys
- Individually lit, color-coded touch response keys
- Easy-to-use menus for advanced features
- Intercom functionality for up to 8 rooms
- Voice labeling for zones, areas and outputs
- Customizable naming and chime groups for specific zones

NX-148E & NX-148E-RF

LCD Keypads

The NetworX wireless LCD display keypad combines traditional format and an easy-to-read, customizable display for complete flexibility in system design.

- Programmable up to 192 zones
- Removable door
- Integrated wireless receiver
- Code entry keypad with backlit keys
- Dedicated Fire, Police and EMS keys
- Five pre-programmed function keys

NX-1815E

Voice Navigation LED Keypad

The NetworX Voice Navigation LED Keypad offers user-friendly management and control of all new NetworX systems.

- Interactive Personal Voice Guide (PVG)
- Voice-enabled status keys
- Customizable naming of zones, areas and outputs
- Double-press Fire, Medical and Panic keys
- Quick Keys for Arm, Stay and Status functions
- Customizable chime groups for specific zones

Customized security to meet your individual needs.

Ideal security means meeting your specific security demands effectively and efficiently. In addition to addressing your current needs, NetworX systems are designed to accommodate a changing environment. This built-in flexibility allows you to easily add or modify security components so that you're assured optimum security now and in the future.
